

# .NET Developer (EN)

Specifications:

- Location: Woerden
- Language: Dutch - English
- Number of hours: 32 - 40
- Salary indication: €4,000 - €4,400

Would you like to contribute to the well-being of our elderly citizens in a fun and innovative way? At SilverFit, you can do just that by developing software designed to help seniors exercise in an engaging way through gamification, video, and music—from gross motor skills to simple swallowing exercises.

## What we create

At SilverFit, we create software that helps seniors rehabilitate using games, video, and music. This involves a lot of technology. As a SilverFit Developer, you're the one who makes that possible. With an ever-growing number of products and an expanding international market, we're looking for a versatile developer who can strengthen our team in multiple areas: from frontend and backend to cloud services and DevOps.

## What you bring

- You're a versatile developer who feels comfortable in various domains: from frontend to backend architecture and cloud infrastructure.
- You enjoy tackling technical challenges and are willing to dive into new technologies when needed.
- You work well in a team (we work with a Scrum variant at SilverFit) and proactively commit to working together toward a goal or deadline.
- You maintain oversight of project goals and progress during the development process.
- You can communicate effectively with both software developers on your team and non-technical team members and stakeholders.
- You enjoy working meticulously and thoughtfully on stable software and maintainable code; you're accustomed to writing unit tests and testable code.
- You have a pragmatic mindset and find the right balance between perfection and 'done is better than perfect'.
- You are comfortable conducting test sessions with elderly users.

## What you'll do

- You'll work together in a team of programmers, testers, UX designers, and artists.
- You'll develop Unity games and exercises that help people with their rehabilitation.
- You'll build user interfaces in WPF (MVVM) and work on the underlying architecture of our desktop applications.
- You'll create driver libraries to read sensors (3D cameras, spirometers, surface-EMG), store data, and process it into stable game controls.
- You'll contribute to our cloud infrastructure and Azure services for content distribution, license activation, and data analysis.
- You'll help where needed with DevOps tasks such as CI/CD pipelines, deployment automation, and infrastructure maintenance.
- You'll take initiative to tackle technical debt or refactor code where necessary.
- You'll occasionally visit clients to test prototypes with our target audience.

## Requirements

- You have at least 3 years of solid work experience in software development.
- You have experience with C# development and are willing to dive into various technologies.
- You are proficient in English (Dutch is a plus)
- You are available 32-40 hours per week.
- You have a bachelor's/master's level of thinking and working.

## What we offer

- A challenging job where you can apply and further develop all your skills;
- Being part of Scrum teams where team spirit and positivity are highly valued;
- Contributing ideas about the direction of products and/or the scrum process;
- Working in Woerden, within walking distance of the train station and with ample parking;
- Participation in a premium-free collective pension insurance;
- Twenty-five vacation days with a full-time contract (40 hours per week);
- Daily free catered lunch and fresh fruit;
- A competitive gross monthly salary. The exact salary will be aligned with your education level and experience.

SilverFit puts the health of its employees first. With us, you get a free catered lunch and fresh fruit, you can join the weekly bootcamp and you get access to the OpenUp platform, which focuses on improving mental and physical well-being (for you and your family members).

If you are the ideal candidate, we'd love to hear from you. Send us your application, including a motivation letter and CV, addressed to Anneke Dekker, to [info@silverfit.com](mailto:info@silverfit.com) . Would you like more detailed information? Please contact us at 0348 - 769 110.

**Recruitment in response to this vacancy is not appreciated, but do you know someone who fits this profile? Feel free to pass on the vacancy!**
