

# ESG Performance 2024

## SilverFit

Based on the hardware disposed of by **Vooruit** in 2024

### Distribution of reuse and recycling\*

- 15% Reuse
- 58% Material recovery (recycling)
- 3% Energy recovery
- 21% Other material recovery
- 1% Thermal disposal
- 1% Landfill

### Processing

In total **703 kilos** decommissioned hardware were **disposed of** by Vooruit. Of this, **103 kilos** were **reintroduced to the market** after data removal.

A total of **600 kilos** of the registered equipment has been **recycled** according to the highest Dutch standards.

**6 data carriers** were **wiped** software-wise and **101 data carriers** were physically **destroyed**.

### Results

By reusing equipment, new purchases were avoided. This resulted in a significant reduction in CO2 emissions for **SilverFit**.

**SilverFit** also created **18 hours of employment** for people with a distance to the labor market.
